WATER HEATER

Beyer Plumbing Service

WATER SOFTENERS

At Beyer Plumbing, we make it easy to get a water softener system installed in San Antonio, TX. Having hard water in your Alamo City home can lead to a variety of issues. Hard water is defined as having high levels of minerals in it. These minerals can be deposited in your pipes and cause an array of issues. They may also leave water spots on your dishes and keep soap from creating suds. To prevent these issues, we can perform a water softener installation in your San Antonio home!

Professional Series Control Valve

- Water use is monitored for peak efficiency (Metered Controls)
- Built in backup of settings during power outages
- Simple diagnostics and design provide for easy maintenance
- Regenerates only when necessary saving salt and water

High Quality Brine Tank

- High quality, durable construction
- Safety float system helps prevent overflow of the brine tank
- Constructed of corrosion-free materials
- Larger brine tank sizes available

Basket Style Distribution System

- Delivers evenly distributed and high quality flows
- Optional Enpress® Vortech™ Plate Tank style distribution system, providing increased backwash efficiency using less water and saving money
- Gravel support bed shown used on larger systems

Arrows indicate water flow through the system as it softens.

Exclusive Media Bed

- High quality, chlorine resistant media bed, for years of continuous service
- Uniform bead size and distribution for optimum flow rates
- Additional softening resins available to target specific water issues

- ✓ WiFi / Remote Access / App
- ✓ Built in Leak Detection through DROP HUB
- ✓ Monitors water usage

WATER CONDITIONERS

Not every home is plumbed or has space for a full water softener system. Water Conditioners can help bridge that gap by providing most of the same benefits as a water softener with a fraction of required space and time. These are saltless systems, so there is no need to monitor your system for regular refilling.

Water conditioners can either be placed inside a home or garage, or in some cases be buried in the ground outside the home connected to the incoming water line. Water conditioners are not softeners, but they do eliminate chlorine and sediments from entering into your plumbing system.

MAINTENANCE FREE • 10 YEAR WARRANTY Whole House Filtration & Conditioning System

💧 **STAGE 1** HALO Granular Activated Carbon (GAC)
Acid-washed GAC for the general removal of chlorine, chloramines, gases, dyes, fuels, heavy metals, man-made pollutants, disinfectants, pesticides, TTHM, sodium hypochlorite, undesirable odors, undesirable taste and volatile organic contaminants.
Our GAC meets or exceeds NSF/ANSI Standard 61 and all Food Chemical Codex, AWWA, ASTM and USP Standards.

💧 **STAGE 2** HALO Catalytic High Activity Carbon (HAC)
Catalytic HAC is an outstanding material for successfully reducing free chlorine from water supplies. The end product is clean, fresh water with no objectionable taste or odor characteristics. Additionally, HAC can be used for filtering waters having a wide range of pH levels and will impart a high "polish" to the filtered water.
Our HAC meets or exceeds the requirements of the NSF/ANSI Standard 61

💧 **STAGE 3** HALO AG Plus
HALO Ag Plus is an all-natural, environmentally safe media with a large surface area and micro-porous structure. It is a highly efficient filter media for the reduction of suspended matter down to the 5 micron or less range and is thus, extremely effective at removing water turbidity.
Our HALO-Ag Plus meets or exceeds the requirements of the NSF/ANSI Standard 61.

💧 **STAGE 4** HALO High Density Garnet Filter Media
Garnet is a high hardness, high density granular filtration media that can effectively filter down to the 10-20 micron range. It also provides an excellent support bed for the other filtration media.
Our High Density Garnet meets or exceeds AWWA specifications. It is also classified by Underwriters Laboratories Inc.® in accordance with ANSI/NSF Standard 61.

💧 **STAGE 5** HALO Proprietary ION 2.0 Scale Inhibitor Water Conditioner
Our proprietary HALO ION in-line water conditioner uses multi-reversing polarity permanent magnetic fields to alter the molecular structure of positively and negatively charged ions of dissolved calcium and magnesium. This causes the hard water minerals that would normally cause lime scale to stay suspended in the water instead of attaching to pipes and appliances. The conditioned water also helps prevent corrosion due to scale and will dissolve existing scale over time.
With over 45 years of track record, the HALO ION Scale Inhibitor in line water conditioner is a proven, eco-friendly hard water treatment solution.

REVERSE OSMOSIS BENEFITS:

- ✓ **High-Quality Water:** RO systems effectively remove contaminants such as chlorine, lead, arsenic, fluoride, and nitrates, providing cleaner and safer drinking water.
- ✓ **Better Taste:** By filtering out chemicals and impurities, RO water often tastes better and has no odor, making it more enjoyable for drinking, cooking, and making beverages like coffee and tea.
- ✓ **Cost Savings:** Having an RO system reduces the need to buy bottled water, saving money over time and cutting down on plastic waste.
- ✓ **Convenience:** An RO faucet offers purified water directly from your kitchen sink, so you don't have to rely on external filters or bottled water.
- ✓ **Health Benefits:** Removing harmful contaminants and excessive minerals can improve overall water quality, contributing to better hydration and health.
- ✓ **Eco-Friendly:** Reducing plastic bottle consumption and reliance on bottled water makes an RO system an environmentally friendly choice.

DROP Salt Sensor

Low Salt Notifications

Users will be notified if more salt is needed to continue providing softened water

DROP Home Protection Valve

Ability to shut off water to the home when a problem is detected.

Built-in flow meter and pressure sensors can identify a broad range of problems such as continuous flow, leaky toilets, or small leaks from a faucet.

BEYER FAMILY PICK

DROP Leak Detectors

These sensitive devices can detect small traces of water where there should be none. You can configure these leak detectors to notify you of the issue as well as automatically shut off your water

Kohler Soft Close Toilet Seat

Slow close seat is made from Plastic, which is smooth, easy to clean and long lasting.

Isolation Valve

Emergency Shut Off Valves

A shut off valve gives the residence full manual control over the water flow into the home.

BEYER STANDARD

Hose Bib Covers

Our Hose bib covers keep your exterior valves from freezing in low temperatures. With this protection, you help prevent future water leaks during freezes.

RHEEM Extended Warranty

Protection Plus Anode Rod

Add 4 years of extended warranty to your 6 year Rheem Water Heater Tank with these Magnesium Anode Rods

Flood Stop Valves

Taco LeakBreaker

Shut off your water at the water heater when there is a leak detected.

*Does not shut off whole house

BEYER FAMILY PICK

Navian Navi-Circ

Create a Recirculation Line

The NaviCirc recirculation valve is installed under the furthest fixture away from the water heater. Using the built-in pump, water circulates through the NaviCirc to preheat the hot water lines, using the cold supply line as the return line back to the water heater.

BEYER STANDARD

Bidet Seat (Non-Electric)

Kohler

This manual bidet toilet seat requires no electricity or batteries and installs in minutes, connecting to the toilet's water supply line.

Bidet Seat (Electric)

Kohler

Bring the freshness and convenience of personal cleansing to your toilet with the KOHLER® PureWash E580 bidet seat. Complete personalization is at your fingertips with three levels of water temperature, water pressure, and heated seat temperature.

Backflow Preventor Cover

Protect your main water backflow preventor from the frigid elements! This bag will help prevent the backflow from freezing over and you losing water service to your home.
