# WATER SOFTENERS

At Beyer Plumbing, we make it easy to get a water softener system installed in San Antonio, TX. Having hard water in your Alamo City home can lead to a variety of issues. Hard water is defined as having high levels of minerals in it. These minerals can be deposited in your pipes and cause an array of issues. They may also leave water spots on your dishes and keep soap from creating suds. To prevent these issues, we can perform a water softener installation in your San Antonio home!

#### Professional Series Control Valve

- Water use is monitored for peak efficiency (Metered Controls)
- Built in backup of settings during power outages
- Simple diagnostics and design provide for easy maintenance
- Regenerates only when necessary saving salt and water

#### High Quality Brine Tank

- High quality, durable construction
- Safety float system helps prevent overflow of the brine tank
- Constructed of corrosion-free materials
- Larger brine tank sizes available

#### Basket Style Distribution System

- Delivers evenly distributed and high quality flows
- Optional Enpress® Vortech™ Plate Tank style distribution system, providing increased backwash efficiency using less water and saving money
- Gravel support bed shown used on larger systems

Arrows indicate water flow through the system as it softens.

#### Exclusive Media Bed

- High quality, chlorine resistant media bed, for years of continuous service
- Uniform bead size and distribution for optimum flow rates
- Additional softening resins available to target specific water issues

### Nelson C-Series

Softens Water  
32k, 40k, 64k Capacities

BEYER STANDARD

BEYER FAMILY PICK

- ✓ 5 Year Warranty
- ✓ Premium Option
- ✓ shut-off water remotely using the DROP App
- ✓ Includes Salt Sensor
- ✓ WiFi / Remote Access / App
- ✓ Built in Leak Detection through DROP HUB
- ✓ Monitors water usage

### DROP Smart City Water Softener

Softens AND Filters Water  
32k, 40k, 64k Capacities

- ✓ 5 Year Warranty
- ✓ Premium Option
- ✓ Filters water First before softening process
- ✓ Includes Salt Sensor
- ✓ WiFi / Remote Access / App
- ✓ Built in Leak Detection through DROP HUB
- ✓ Monitors water usage

**DROP Salt Sensor**

**Low Salt Notifications**

Users will be notified if more salt is needed to continue providing softened water

**DROP Home Protection Valve**

Ability to shut off water to the home when a problem is detected.  
Built-in flow meter and pressure sensors can identify a broad range of problems such as continuous flow, leaky toilets, or small leaks from a faucet.

BEYER FAMILY PICK

**DROP Leak Detectors**

These sensitive devices can detect small traces of water where there should be none. You can configure these leak detectors to notify you of the issue as well as automatically shut off your water

**Kohler Soft Close Toilet Seat**

Slow close seat is made from Plastic, which is smooth, easy to clean and long lasting.

**Isolation Valve**

**Emergency Shut Off Valves**

A shut off valve gives the residence full manual control over the water flow into the home.

BEYER STANDARD

**CO2 Monitor**

Monitors carbon monoxide in the room(s) to protect you and your family. A must have for any residence with gas appliances

**RHEEM Extended Warranty**

**Protection Plus Anode Rod**

Add 4 years of extended warranty to your 6 year Rheem Water Heater Tank with these Magnesium Anode Rods

**Flood Stop Valves**

**Rheem LeakGuard or Taco LeakBreaker**

Shut off your water at the water heater when there is a leak detected.  
\*Does not shut off whole house

BEYER FAMILY PICK

**Navian Navi-Circ**

**Create a Recirculation Line**

The NaviCirc recirculation valve is installed under the furthest fixture away from the water heater. Using the built-in pump, water circulates through the NaviCirc to preheat the hot water lines, using the cold supply line as the return line back to the water heater.

BEYER STANDARD

**ScaleRX**

**ScaleRX**

ScaleRX protects your water heater from limescale buildup and keeps it running efficiently Used in place of a Water Softener (tankless ONLY),

**Nelson Residential RO**

**Residential RO**

It works by forcing ordinary tap water through a semi-permeable membrane which removes up to 99% of harmful water contaminants such as taste, odor, VOCs, fluoride, as well as toxic levels of arsenic, lead, nitrates, heavy metals.

BEYER STANDARD

**Culligan RO**

The Culligan® Aquasential™ Tankless Reverse Osmosis (RO) System provides better water when and where you need it, without taking up extra space. This efficient system instantly filters water to deliver a continuous supply when you need it most.
